Resource management system used in construction industry, has resource manager that communicates with virtual job site office, estimator and procurement function for managing use of requested items at particular...

Inventor: COMO B

Abstract (Basic):

... A procurement function (04) orders the requested items for a particular location represented by a **virtual** job site office. The usage of requested items and other resources is managed by a resource manager (07) that communicates with **virtual** job site office, estimator and procurement function.

... The resources are managed efficiently by **virtual** job site office for purchased goods and services on the designated location. The cost of...
